## How to order a HYDROMAT A3 series cylinder compliant with ISO 6020/2

The HYDROMAT A3 series cylinders compliant with ISO 6020/2 standards are provided with an identification code which describes the construction specifications in a non-ambiguous way. To make up the code for the order, follow the code diagram set out below and insert the letters identifying the various features of the desired cylinder in the sequence given below.

Features	Description	Code
<b>Series</b>	To ISO 6020/2 standards To ISO 6020/2 standards with magnetic sensor <sup>1)</sup> To ISO 6020/2 stand. for taking lin. transducers <sup>2)</sup>	A3 M3 T3

### Cylinder ordering code

Omit if is not look for

Example of cylinder code:  
**A3063H0125E02**

**A3** = series differential Cylinder compliant with ISO 6020/2  
**063** = bore 63  
**H** = rod 28  
**125** = stroke 125  
**E** = front cushioning  
**02** = rectangular rear flange (not compliant with ISO standards).

The positions of the inlet connections and front cushion are standard so they are not specified in the order code (oil feeding inlets side 1 on head and cap - cushion side 3 on head

When issuing the order for the cylinder, provide the following information:

- code identifying the model
- quantity
- special features (if requested) with any enclosed sketches and/or construction drawings
- operating conditions for special uses
- delivery date with type of priority

Code	Description	Features
K00	Specify the position of the front and rear inductive sensors	<b>Position of inductive sensors</b>
S00	Specify the position of the front and rear air bleeds	<b>Position of air bleeds</b>
R00	Specify the position of the front and rear braking adjustment devices	<b>Position of braking adjustment devices</b>
P00	Specify the position of front and rear connections	<b>Position of connections</b>
-	Specify the number of spacers (multiples of 50 mm)	<b>Spacers</b>
T U <sup>3)</sup> V <sup>4)</sup>	Seals for water and glycol mixtures Low friction seals Seals for high temperatures and/or aggressive fluids	<b>Seals</b>
D <sup>5)</sup> E <sup>5)</sup> F <sup>5)</sup>	Front inductive sensor Rear inductive sensor Front and rear inductive sensor	<b>Inductive sensors</b>
A B C <sup>6)</sup>	Front air bleed Rear air bleed Front and rear air bleeds	<b>Air bleed</b>

- <sup>3)</sup> Minimum working pressure: 20 bar  
<sup>4)</sup> Max. working temp. for M3, T3 and A3 series cylinders fitted with inductive sensors: 70 °C  
<sup>5)</sup> Using inductive sensors, the cylinder must be provided with cushioning (front or rear)  
<sup>6)</sup> Not available for bores 25 and 32, see page 42  
<sup>6)</sup> Compulsory for T3 series cylinders

Example of cylinder code:  
**A3100M0400PW10/FUP14K22**

**A3** = series differential Cylinder compliant with ISO 6020/2 standards  
**100** = bore 100, **M** = rod 45, **0400** = stroke 400,  
**P** = cushioning on both ends,  
**W** = female thread rod ends  
**10** = extended front tie rods (ISO Mx3)  
**F** = front and rear inductive sensor, **U** = low friction seals  
**P** = position of incoming connections side 1 on the head and side 4 on the cap  
**K** = position of inductive sensor side 2 on head and 2 on cap

- standard cushion position side 3 on head and cap (see Table 19 on page 64).

<sup>1)</sup> Not available for bores 160 and 200, see page 40

<sup>2)</sup> Not available for bores 25, 32, 40 (rods 18 and 22), 50 (rod 22), see page 43
