* Unless otherwise specified, all dimensions are given in millimetres.

How to order a HYDROMAT M1 series cylinder compliant with ISO 6020/1

The HYDROMAT M1 series cylinders compliant with ISO 6020/1 standards are provided with an identification code which describes the construction specifications in a non-ambiguous way. To make up the code for the order, follow the code diagram set out below and insert the letters identifying the various features of the desired cylinder in the sequence given below.

Features	Description	Code
Series	M1 Differential cylinder according to ISO 6020/1 M1 Double rod cylinder ¹⁾ M1 Cylinder with linear transducer ¹⁾	M1CD M1DK M1CT
Bore	Specify bore in mm (indicate 3 figures)	-
Rod MM (diameter)	14 mm (bore 25) 18 mm (bore 25 and 32) 22 mm (bore 32 and 40) 28 mm (bore 40 and 50) 36 mm (bore 50 and 63) 45 mm (bore 63 and 80) 56 mm (bore 80 and 100) 70 mm (bore 100 and 125) 90 mm (bore 125 and 160) 110 mm (bore 160 and 200) 140 mm (bore 200)	B D F H L M P R T V Z
Stroke	Specify the stroke in mm (indicate 4 figures)	-
Cushioning	Without cushioning Front cushioning Rear cushioning ¹⁾ Cushioning on both ends ¹⁾ Double rod without cushioning Double rod with cushioning	C E G P S T
Rod end	Thread (ISO 6020/1) Thread (VW standard VW 39 D 920)	Y W
Mounting type	Basic version (not in line to ISO 6020/1) Rectangular front flange -MF1 (not in line to ISO) Rectangular rear flange -MF2 (not in line to ISO) Side foot - MS2 Intermediate fixed trunnion - MT4 Rear clevis - MP3 Rear spherical bearing - MP5 Round front flange - MF3 Round rear flange - MF4	00 01 02 03 06 07 08 13 14

¹⁾ Not available for bores 25, 32, 40 (rods 14, 18 i 22), see page 43

Example of cylinder code:
M1CD063M0125E01

M1CD = series differential Cylinder compliant with ISO 6020/1
063 = bore 63
M = rod 45
125 = stroke 125
E = front cushioning
01 = rectangular rear flange MF1 (not compliant with ISO standards).

The positions of the inlet connections and front cushion are standard so they are not specified in the order code (oil feeding inlets side 1 on head and cap - cushion side 3 on head and cap - specified in Table 19 on page 62).

- When issuing the order for the cylinder, provide the following information:
- code identifying the model
 - quantity
 - special features (if requested) with any enclosed sketches and/or construction drawings
 - operating conditions for special uses
 - delivery date with type of priority

Code	Description	Features
K00	Specify the position of the front and rear inductive sensors	Position of inductive sensors
S00	Specify the position of the front and rear air bleeds	Position of air bleeds
R00	Specify the position of the front and rear braking adjustment devices	Position of braking adjustment devices
P00	Specify the position of front and rear connections	Position of connections
-	Specify the number of spacers (multiples of 50 mm)	Spacers
T U ²⁾ V ³⁾ Z	Seals for water and glycol mixtures Low friction seals Seals for high temperatures and/or aggressive fluids Seals for heavy application - Chevron seals	Seals
D ⁴⁾ E ⁴⁾ F ⁴⁾	Front inductive sensor Rear inductive sensor Front and rear inductive sensor	Inductive sensors
A B C ⁵⁾	Front air bleed Rear air bleed Front and rear air bleeds	Air bleed

- ²⁾ Minimum working pressure: 20 bar
- ³⁾ Max. working temp. for M1CT and M1CD series cyl. fitted with inductive sensors: 70 °C
- ⁴⁾ Using inductive sensors, the cylinder must be provided with cushioning (front or rear)
- ⁵⁾ Not available for bores 25 and 32, see page 42
- ⁵⁾ Compulsory for M1CT series cylinders

Example of cylinder code:
M1CD125T0800PW03/FUP14K22

M1CD = series differential Cylinder compliant with ISO 6020/1 standards
125 = bore 125, **T** = rod 90, **0800** = stroke 800,
P = cushioning on both ends,
W = thread rod ends (VW standard VW 39 D 920)
03 = side foot (ISO MS2)
F = front and rear inductive sensor, **U** = low friction seals
P = position of incoming connections side 1 on the head and side 4 on the cap
K = position of inductive sensor side 2 on head and 2 on cap

- standard cushion position side 3 on head and cap (see Table 19 on page 62).
